

OK-450

Dual Station Industrial Heat Press

48" x 68" 60" x 120" & Custom Size

The **Practix OK-450** is the heavy duty, two work station, high productivity press utilized for applications such as heat pressing, fusing of piece goods, thermo-printing and embossing.

Operator simplicity with minimum physical effort and high productivity are the results of this heavy duty, air operated press. There is no need to manually slide trays back and forth! One working surface is available for loading with the preparations for the next set is underway.

A precision electronic temperature controller, adjustable to prevent any difference between actual platen temperature and the digital display, and a timer, which can control duty cycles 1/10th of a second in duration, assure consistent quality of work.

Platen Size	48" x 68"	"60" x 120"
Platen Force	up to 50 psi	up to 50 psi
Electrical	240V 3PH	240V 3PH
